PROFESSIONAL SUMMARY

Python Backend Developer and AI Engineer Intern at Northcorp Software with 6 months experience building AI-powered REST APIs using FastAPI, PostgreSQL, LLM integration, RAG pipelines, and Google Gemini API. Skilled in SQLAlchemy ORM, Docker, Alembic, and MinIO. Background in Machine Learning, Data Science, and Data Analysis using Scikit-learn, Pandas, and EDA. Google Cloud Generative AI certified. TCS NQT 2025 qualified (Top 10%).

EDUCATION

Graphic Era Hill University

Bachelor of Technology (B.Tech) in Computer Science and Engineering – CGPA: 6.88/10

Haldwani, Uttarakhand

July 2022 – June 2025

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: FastAPI, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Pydantic

Databases: PostgreSQL, MySQL, SQLAlchemy (Async ORM), Alembic, MinIO

AI / ML / GenAI: LLM Integration, Generative AI, Google Gemini API, RAG, NLP, TF-IDF, Feature Engineering, EDA, Data Preprocessing, Supervised Learning, Model Evaluation (MSE, R^2)

Tools & DevOps: Git, GitHub, GitLab, Docker, Docker Compose, JWT, bcrypt, Swagger, VS Code, Jupyter Notebook, Power BI, MS Excel (Advanced)

PROFESSIONAL EXPERIENCE

AI Engineer Intern

Northcorp Software

Jan 2026 – Present

Remote

- Built 10+ REST API endpoints for AI-powered Talent Assessment Platform (TAP) using FastAPI and PostgreSQL — skill gap analysis, resume generation, and cover letter automation.
- Developed LLM features using Google Gemini API and RAG pipelines; managed PostgreSQL schema with SQLAlchemy async ORM, 5+ Alembic migrations, MinIO storage, and JWT + bcrypt auth.
- Deployed services via Docker Compose; contributed across design, development, and testing using GitLab workflow.

PROJECTS

House Price Prediction | Python, Scikit-learn, EDA, Linear Regression

GitHub

- Built Linear Regression model using Scikit-learn to predict house prices with full EDA pipeline — missing value handling, outlier removal (IQR method), and feature scaling.
- Evaluated model performance using MSE and R^2 score; applied train-test split and bias-variance tradeoff analysis to improve prediction accuracy.

Courier Partner Web App | Python, FastAPI, REST API, HTML, CSS

GitHub

- Built full-stack FastAPI web application with REST API endpoints, HTML frontend integration, and static file handling for a courier partner service.
- Structured scalable backend using FastAPI with database connectivity and auto-generated Swagger documentation for API exploration and testing.

ACHIEVEMENTS & CERTIFICATIONS

- Cleared **TCS National Qualifier Test (NQT) 2025** – shortlisted for Ninja role interview among top 10% candidates nationwide
- Completed **Google Cloud Skills Boost** certification in Generative AI Fundamentals (2024)
- Python Development Internship Certificate** – Cognifyz Technologies (2024)
- Represented state at **National Basketball Championship**, demonstrating teamwork, leadership, and performance under pressure
